Dear Brad:

Enclosed is a copy of the lab analysis report I received for the land-fill leachate sample submitted to Aqualab, Inc. on July 5, 1984.

If you have any questions or further comments about this report, please call me at 253-2340 ext. 555.

Thank you for your time and assistance in this matter.

Sincerely,

Robert M. Livingston

RECEIPT OF AGENCY DOCUMENTS

I, Butch Pearson, acknowledge that on this date, I personally appeared in the offices of the Illinois Environmental Protection Agency, at ILLINOIS ENVIRONMENTAL PROTECTION AGENCY
DIVISION OF LAND POLLUTION CONTROL
1701 SO. FIRST AVENUE - SUITE 600
MAYWOOD, ILLINOIS 60153

that I requested and received the following Agency files or documents for my personal inspection:

031 009 0001

ARLINGTON HTS. / MUNI

I further acknowledge that I have been advised, in writing, that certain documents, alleged by the Agency to fall within the exception of Ill. Rev. Stat., Ch. 111 1/2, Sec. 1007, have been withheld from my inspection; and that I have been given permission to photocopy the list of such withheld documents. (Strike and initial if inapplicable)

March 2, 1977

Mr. Allen Sander
Village Engineer
Village of Arlington Heights
33 South Arlington Heights Road
Arlington Heights, Illinois 60005

Dear Mr. Sander:

Confirming our telephone conversation of earlier today, I am enclosing copies of the required Comprehensive Water Analysis List for background surface and ground water samples and a typical monitor well installation diagram showing this Division's construction requirements. A recommended permanent sampling point for the proposed ice skating-storm water retention pond would be midway along its southeast side (nearest the landfill). The well should be installed near the middle of the area enclosed by the 710 contour (Figure 2 - Grading Plan - Landfill Site Master Plan by Stanley Consultants, Inc., dated November 29, 1976) immediately northwest of the water storage tank. Due to its location in the final-use picnic area, installation of the optional well protection pipe and locking cap as shown on the diagram is strongly recommended.

The following data shall have been submitted in duplicate to the Agency by June 30, 1977:

1. monitoring point location map showing finalized locations of the points described above;
2. a monitor well construction diagram showing all materials, screened interval, depth to water (after 24 hours) and casing head elevation;
3. results of comprehensive background samples from both monitoring points;
4. a boring log of the Village water supply well located south of the site.

Page 2

Following receipt and review of the above information, a routine quarterly monitoring program in accordance with Rules 317 and 318(a) of the Illinois Solid Waste Rules and Regulations will be established by this office. Should questions arise during the closure of the site, do not hesitate to contact either myself or the Aurora Regional Office.

Very truly yours,

Thomas P. Clark
